

On Target Performance Management System

Job Title: Geologist (Gas) - Indiana, PA **Reports To:** District Geology Manager - Gas
Alt. Title(s): **Department:** CPA Operations - Indiana, PA
Salary Range: **Reference Code:** C50286645-3

Position Summary

Note: The level of this position will be determined by the successful candidate's experience.
Performs work in a safe manner at all times. Performs complete and accurate studies of specific geological sites through effectively performing data interpretation and analysis. Supports the safe, timely and cost-effective completion of new wells and workovers that coincide with departmental goals and objectives.

Target Responsibilities

Work safely at all times surrounded by unpredictable field conditions, continuously moving vehicles and equipment, adverse weather conditions.
Must possess a good understanding geologic principles and applications, especially structural geology and stratigraphy as they relate to petroleum exploration and development.
Must have a working knowledge of geophysical log analysis, cross-section generation, isopach mapping and petroleum fundamentals.
Knowledge of GeoGraphix software is a plus.
Must be willing to perform field work, including well logging jobs, casing and cement design and implementation. Occasional coring and sample well-site work is also expected on an as needed basis.
Provide effective departmental support through diligently performing assignments for developing technical and industry knowledge.

Minimum Requirements

Must be a highly safety minded individual.
Bachelor's degree in Geology required, Master's degree preferred.
Minimum of 0-5 years geosciences experience in the oil and natural gas industry. Willing to work in adverse weather conditions, nights, weekends and holidays.
Must possess effective verbal and written communication skills.
Must possess basic computer skills: Excel Word and Power Point.
Must be able to drive safely off-road in adverse conditions.
May require travel and short-term assignments to other operating areas.
